## SKILL

---

- HTML/CSS
- Bootstrap
- Tailwind
- JavaScript
- React
- Golang
- Hyperledger Fabric
- Blockchain
- CouchDB
- Wordpress
- Software project management
- Familiar with Python and Django

## INTREST

---

- Gaming
- NFT's
- Blockchain
- Web 3.0

## LANGUAGE

---

- English
- Urdu

## EDUCATION

---

### BACHELOR IN SOFTWARE ENGINEERING

2018 - 2022 Visual COMSATS University  
Islamabad, Abbottabad Campus

## EXPERIENCE

---

### AUG, 2022 THE SKYNTH (JUNIOR WEB 3.0 INTERN)

- Creating landing pages for various websites
- Working on a Blockchain Startup
- Exploring web 3.0

## PROJECT

---

### FYP SMART POLICING SYSTEM USING BLOCKCHAIN

The smart policing system is a novel blockchain system that will be a solution to the traditional policing system. Currently, we have centralized file storage system data can be theft and lost, also the admin has the privilege to edit data. So there is a window open for evidence tampering. The smart policing system uses hyperledger fabric blockchain to store data distributedly and it has cryptographic PKI so tampering will be near.
